16-19

A bridge between school/college/work placements and apprenticeships, giving young people opportunities to learn how to do things for themselves in real life situations.

The sixth form base is closely aligned with our young people's desire for more independence and a more 'grown up' feel to their school day. This provision is a bridge between school and college or work placements and apprenticeships. It will give young people opportunities to learn how to do things for themselves in real life situations.

For some the work will closely link to our work experience programmes and internships for others it will be more based on learning how to live more independently or enabling them to have a greater number of choices as they move on in the future.

The facilities at Middlefield Lane include two kitchen areas, the work skills DIY practical workshop, offices and usual classrooms as well as outside growing areas and areas for leisure.

This week at V6F:

The last half term of the year is upon us and everyone is still working hard! We have a very busy few weeks coming up with lots going on, including parents evening, sports week and residential for leavers.

Some young people have been engaging with the “Mamma Mia” story. They have listened well to the story and then worked hard to make biscuits.

Please be prepared for the changing weather

All groups go out into the community, so everyone needs to be ready for any weather.

Some young people are continuing to grow their skills with weekly tennis coaching sessions. Their confidence is growing as the work on their serves, the different strokes and take part in matches.

Some students have been working on their sports skills as part of healthy lifestyles. They engaged with a variety of circuits before settling on using basketball skills to dribble the ball around cones or along a ladder and then shoot hoops. They also had a go at knocking over the skittles, along with organising the pins in between bouts.
